Capital Market Review & Outlook

Pakistan's equities market performance remained extremely volatile during the year under review influenced by various domestic and exogenous factors. Aggressive measures by the Government of Pakistan and the State Bank of Pakistan to counter negative economic impacts of the pandemic and the subsequent lockdown including reduction in interest rates and the construction package regained momentum and the KSE100 Index closed the year at 47,356. Moreover, lower inflation and interest rates are likely to keep the equities market in limelight with improved earnings growth outlook.
